

**Professor Liwen JIANG**  
**Choh-Ming Li Professor of Life Sciences and**  
**Director of AoE Centre for Organelle Biogenesis and Function**  
**The Chinese University of Hong Kong**

**Biography**

Professor Liwen JIANG is currently Choh-Ming Li Professor of Life Sciences and Director of AoE Centre for Organelle Biogenesis and Function, as well as Director of Centre for Cell and Developmental Biology at The Chinese University of Hong Kong (CUHK). Professor Jiang joined the Department of Biology of CUHK as an Assistant Professor in 2000 and was promoted as Professor in 2007.

Professor Jiang's research team has been working on the underlying mechanisms of protein transport, organelle biogenesis and function in plants for almost 15 years at CUHK, and has been internationally recognized as a leading group in the field. Major contributions include the identification of multivesicular body (MVB) as prevacuolar compartment and trans-Golgi network as early endosome as well as the novel EXPO compartment and EXPO-mediated unconventional protein secretion pathway in plant cells.

Professor Jiang received numerous awards for teaching and research achievements, including CUHK Science Faculty Exemplary Teaching Award 2008, CUHK Research Excellence Award twice (2006-07 & 2009-10), Croucher Senior Research Fellowship twice (2009-10 & 2015), Ministry of Education (MOE) Higher Education Outstanding Scientific Research Output Awards twice (2009 & 2013), Outstanding Fellow of the Faculty of Science (2013) and Choh-Ming Li Professorship of Life Sciences (2014). Graduate students from Professor Jiang's lab have also received many prestigious awards including CUHK Young Scholars Dissertation Award (twice), Postgraduate Research Output Award (four times), Keystone Symposium Scholarship (twice) and Human Frontier Science Program Long-Term Fellows (twice).
